SĀMYA: BEAUTY-TECH PLATFORM

How to View Your *Live Survey Data*

Status: Active & Live

Domain: samyaglobal.com

Document Ver: 1.0 (Production)

This operational guide outlines how the Sāmya founding and research team can access, monitor, and synchronize live research survey responses collected from participants on www.samyaglobal.com.

1 Method 1: Instant Google Sheets Live Sync (Recommended)

REAL-TIME CLOUD SYNCHRONIZATION

You can connect your Google Sheet to the live database in 5 seconds without installing any plugins, scripts, or add-ons. Google Sheets will automatically pull all 21 columns and refresh as participants complete their profiles.

1. Open any Google Sheet (or create a new one at **sheets.new**).
2. Click into cell **A1** (top-left corner).
3. Paste the following exact formula and press **Enter**:

```
=IMPORTDATA("https://www.samyaglobal.com/api/responses")
```

PASTE IN A1

> **Pro-Tip for the Team:** Create a separate second tab in your Google Sheet (e.g., named *"Analysis"* or *"Outreach Queue"*) that references these rows with `=QUERY()` or `=FILTER()` so you can assign shade-testing kit tracking statuses without disrupting incoming raw responses.

2 Method 2: Direct Spreadsheet Download (.CSV)

OFFLINE ANALYSIS & EXCEL / NUMBERS EXPORT

If you prefer opening the dataset in Microsoft Excel, Apple Numbers, or uploading into a CRM:

`https://www.samyaglobal.com/api/responses`

Clicking this link automatically downloads the latest snapshot formatted as `samya_research_responses.csv` with proper UTF-8 character encoding.

3 Method 3: Live Developer JSON API

PROGRAMMATIC ACCESS

For custom analytics dashboards, database ingest pipelines, or automated email triggers:

`https://www.samyaglobal.com/api/responses?format=json`

Returns a standardized JSON payload with total record count and an array of individual participant objects sorted in reverse-chronological order.

4 Data Schema: 21 Captured Fields

Every submission captures structured data across the entire 18-screen participant journey:

Col	Field Name	Survey Source	Example Value
A	**Timestamp**	System Generated	2026-11-03T04:48:21Z
B	**Participant ID**	System Generated	SAM-967934
C	**Full Name**	Screen 2: Registration	Aanya Sharma
D	**Email**	Screen 2: Registration	aanya@example.com
E	**Phone Number**	Screen 2: Registration	+91 98765 43210
F	**Opt-in Updates**	Screen 2: Registration	Yes / No
G	**State / Territory**	Screen 3: Geography	Maharashtra
H	**Past Experience**	Screen 4: Pain Point	Closest available shade but not right
I	**Biggest Challenges**	Screen 5: Multi-chips	Oxidation; Undertone mismatch
J	**Skin Tone Depth**	Screen 6: Tone Tile	300 / Medium Deep
K	**Undertone**	Screen 7: Undertone	Warm (Golden, yellow, peachy)
L	**Seasonal Shift**	Screen 8: Shifts	Yes, noticeably across seasons
M	**Testing Interest**	Screen 9: Intent	Yes, I'd love to test samples
N	**Completion Status**	Screen 10 / 18	Full Profile / Initial Experience
O	**Current Brand**	Screen 11: Products	MAC NC40, Maybelline 228
P	**Neck vs Face Match**	Screen 12: Visual	Face is slightly darker than neck
Q	**Match Priorities**	Screen 13: Multi-chips	At-home testing; No oxidation
R	**Skin Status Now**	Screen 14: Sunlight	Standard depth / More tanned
S	**Confidence**	Screen 15: Accuracy	Very confident / Guessing
T	**City / Town**	Screen 16: Logistics	Mumbai
U	**Testing Consent**	Screen 17: Agreement	Yes, happy to test and share feedback
